## About this dataset

This data report forms part of a series of publications from SafeLives' Adult Insights dataset. It contains 2,591 unique individual cases at intake and 2,142 matched cases at exit, drawn from 18 Idva services across England and Wales which used the SafeLives Insights outcome measurement service between April 2017 and March 2018. It compares this year's data to data from the SafeLives Insights datasets for 2016-17 and 2015-16.

SafeLives runs the largest national database of domestic abuse cases in the UK. Our Insights database has records of more than 69,000 unique cases of adults experiencing domestic abuse from 2009 to date, and a further 3,617 unique cases of children in domestic abuse households from 2011 to date. These datasets give us an unparalleled overview of the national picture of domestic abuse. We hope that everyone working to stop domestic abuse will be able to use this data to improve their services so that victims and families get the right help sooner.

# At a glance

**21 services**

**2,591 clients  
entered  
services**

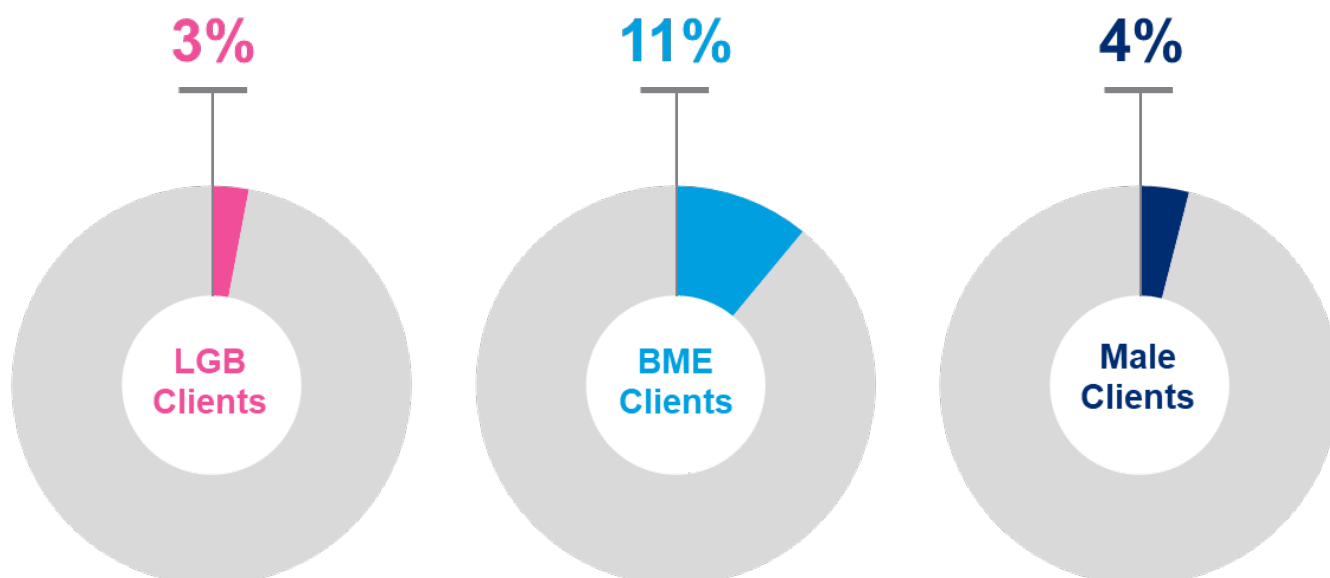

**2,142 cases  
closed**

**1,441 clients  
supported with  
criminal and civil  
justice**

Location of the services in the dataset

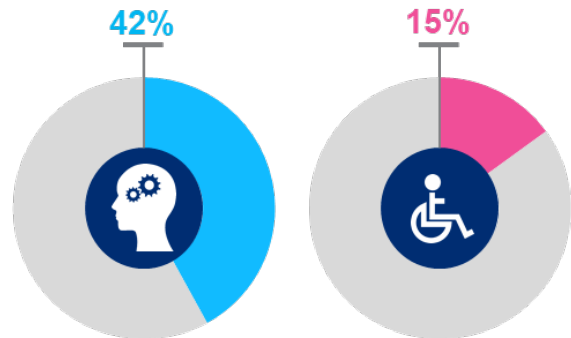

## Proportion of clients from diverse client groups

# Key findings

After support from an Idva, the **abuse stopped completely** for more than half of clients

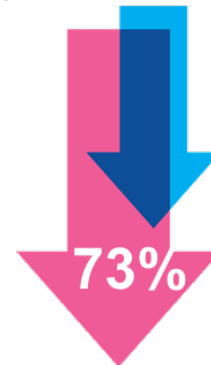

**Two-fifths** of clients had issues with **mental health**, and **15%** had a **disability**. **9%** of clients had a **physical disability**.

**40%** of children in households where domestic abuse was taking place **were not known to children's services**

**Risk was reduced** for nearly three quarters of clients

following support from an Idva

The perpetrator of abuse had a **criminal record** in two thirds of cases

In cases with recorded police reports, the perpetrator of abuse was **arrested** in **80%** of cases

and **charged** in **60%** of cases

# Service inputs

## Cases used in the analysis

Intake forms	2,591
--------------	-------

In the period April 2017 to March 2018, caseworkers submitted 2,681 intake forms for clients entering Idva services. 78 forms were excluded from the dataset due to the client appearing twice, and 12 forms were excluded due to being completed incorrectly. These forms contain information about client demographics, and the characteristics of the abuse that clients accessing Idva services are experiencing.

For the period April 2016 to March 2017, there were 4,026 valid forms submitted, and for the period April 2015 to March 2016 there were 6,287 valid forms submitted.

Exit forms	2,142
------------	-------

Caseworkers submitted 2,261 exit forms for clients leaving Idva services for the period April 2017 to March 2018. Of these 62 of these were excluded due to the client appearing more than once, and 58 were excluded due to being completed incorrectly. These forms were then matched to their corresponding intake form to provide a picture of client outcomes at the point of exit compared to intake. They also contain information about what interventions the client accessed.

Intake dates may occur prior to the period April 2017 to March 2018. For the period April 2016 to March 2017 there were 4,026 valid forms submitted, and for the period April 2015 to March 2016 there were 5,177 valid forms submitted.

Criminal and civil justice forms	1,441
----------------------------------	-------

Caseworkers supporting clients with criminal and civil justice (CCJ) submitted 1,511 forms for the period April 2017 to March 2018. Of these, 37 were excluded due to the client appearing more than once and 34 were excluded due to being completed incorrectly. These forms provide information on the outcomes of any criminal and civil justice interventions at exit.

For the period April 2016 to March 2017 there were 2,246 valid forms submitted, and for the period April 2015 to March 2016 there were 2,945 valid forms submitted.

New Referrals/ Repeats	2018		2017	2016
	%	n=	%	%
New Referrals	82%	2130	81%	83%
Repeats	18%	461	19%	17%
<b>Total</b>	<b>100%</b>	<b>2,591</b>	<b>100%</b>	<b>100%</b>

Cases are deemed repeats if the client has returned to the service after their case was previously closed (or made inactive).

# Client outcomes

## Outcomes and profile of abuse at exit (Information captured at exit, n=2,142)

The following is an analysis of cases where an exit form was completed during the reporting period. Cases have been matched with their corresponding intake forms, and intake data here relates only to the cases which also have exit data, so will vary from the number of cases in the intake dataset.

86% of the cases with exit data were closed by the case worker according to the service's case closure policy. 14% were made inactive due to a prolonged period of no contact.

Client circumstances at exit	n= 2142		
Living arrangements at exit	2018	2017	2016
Living together	8%	8%	10%
Not living together	85%	84%	84%
Living together intermittently	2%	2%	2%
